Thanks, Fetzer.

Rupert, unfortunately we can't do anything further on this tonight, I am sorry. As you know Bob is in transit now and I just left the bldg. You have access to the data we and Karen summarized on the L common/share drive (used to be there under Water Protection Division/Dimock but now there is a redirect file name there to go to an HSCD folder on this drive - I don't remember the exact name), as well as the OSC website as Bob described.

I agree there is a benefit to being able to reference the source/date of these max values and I believe Stephanie's effort to put all this info into scribe will certainly help us all in that regard. In the mean time we can start w/the student I mentioned going back and pulling dates at least to add to our summary table, but that will not start to happen until next Tuesday.

Lora

Lora Siegmann Werner, ATSDR/CDC Region 3

I wonder since you developed this product if it might just be better if you went back and footnoted each entry? We are going to need to tell folks where each bit of data came from.

DEP spreadsheets originally provided to K Johnson then to us. Only other source is the data tables released in December and provided to EPA and ATSDR by Kunkle (all Cabot data).

Bob, because of the volume and diversity of all the data, we need you to go back on the spreadsheets you prepared and footnote where you captured particular values. Maybe that already exists on some version?

We really need this info as soon as possible given the arrival of new data that is significantly different than the values you reference.

Call anytime if want talk more about it.
